Jan 2022 – Mar 2023

- Developed B2B and B2C e-commerce application using Flutter.
- Built a full ERP software for Android using Flutter.
- Implemented functionalities like push notifications (Firebase), location-based features (Google Maps API) and voice recording, real-time chatting data caching and printing options using flutter .
- Contributed to the front-end development of e-commerce application.

Web Application Developer - IQ Tech Solutions | India

June 2020 – Jan 2022

- Developed responsive and user-friendly front-end designs using HTML, CSS, and JavaScript (Bootstrap, Material UI).
- Developed and integrated RESTful APIs using Nodejs and MySQL in web applications.
- Performed thorough code reviews to identify and address potential issues, ensuring code quality.
- Troubleshooted and resolved bugs efficiently, maintaining a high level of application functionality.
- Utilized Git for version control and streamlined collaboration.
- Created websites in the Wordpress platform.

PROJECTS

Mobile Applications:

1. OxyTrack: [link](#)

- Built a Flutter app (Android, iOS, Web, Windows) for Streamlined Oxygen Management that simplifies cylinder management with QR tracking, refill scheduling with built-in timers, invoicing and book cylinder refills online.

2. Hozzo Carwash Service: [PlayStore](#) | [AppStore](#)

- Developed mobile apps (Android, iOS and web for backend) for car wash booking with a multi-device responsive design from single code base.
- Users can schedule appointments and track technicians in real-time and Integrated secure in-app payment options and location tracking using google API.

3. Keybot:

- ERP app built with Flutter having streamlined business operation, Firebase notifications, real-time chat, voice recording, printing capabilities and social media sharing options.

4. Lamit ERP:

- Dedicated office management system app built using Flutter that manages all office operations seamlessly within a single app and Manage orders effectively with built-in functionalities.

5. Kinza:

- Developed a comprehensive employee management app using Flutter for streamlined workflows. It combines CRM, HRM, task management, and payslip generation. app fosters collaboration and efficient communication with centralized features, printing capabilities, and social media sharing options.

6. Sinca ERP Software:

- Participated in the development of a comprehensive ERP billing software encompassing all essential business modules.

Frontend Designs:

1. Hokybo E-commerce: [link](#)

2. Madariz University Website: [link](#)

3. Tech Predators : [link](#)

4. Fomy Icecreams : [link](#)

5. The Backers Consultancy: [link](#)

7. ChaskaBun: [link](#)

SKILLS

Languages:

- Mobile Development: Flutter, Dart
- Front-end Development: HTML, CSS, JavaScript, TypeScript
- Database: MySQL, NoSQL (MongoDB)

Tools & Frameworks: Android Studio, VS Code, Bootstrap, Material UI ,React.js, Next.js, Tailwind CSS

Technologies: Android, IOS, NodeJS, REST API, GitHub, Figma, Postman, Firebase, JSON, JQuery, puTTY CLI

Concepts: Object Oriented Programming (OOP), Clean Architecture, Functional Programming, Agile, MVVM, Git, SDLC.

Soft Skills: Problem-solving, Fast learning, Critical thinking, Multitasking, Communication, Teamwork, Project management, Leadership, Adaptability, Collaboration, Prompting.
